

Earth Water Systems LLC (ErtWtr)

Overview

Earth Water Systems (ErtWtr) is a research and development company focusing on high-risk technology for sustainable water capture, water re-use and water upcycle domains. Our solutions seek to serve government, commercial and private agencies. Our proprietary solutions range from physical processing devices/reactors to optimised digital solutions to convert, monitor and track contaminated water to clean, safe and ultra-pure water. Overall, our technologies and combined expertise/team seeks to remedy emerging contaminants in drinking water. "Our strength is our people and the experience they bring to your projects with their extensive background in varying engineering disciplines, environmental sciences, and project management."

Capabilities

ErtWtr has the very best professional staff of engineers, scientists and managers available to you for:

- Project Management, Planning, and control – in water related projects
- Nanotechnology filtration systems
- Water purification systems
- Environmental real-time surface runoff water monitoring
- Flow modulation and management systems
- Contaminated water treatment systems

NAICS (Primary)

- 541713 – R&D in Nanotechnology
- 541715 – R&D in the Physical, Engineering, and Life Sciences (except Nanotechnology and Biotechnology)
- 221310 – Water treatment and distribution
